SAGE Knowledge contains information suited to all levels of researchers, from undergraduate students starting their first research projects to the most senior faculty.

PRODUCT TOUR

The **SAGE Knowledge** platform has many tools to simplify the research process, including:

- Ⓢ Table of contents navigation for eBook and eReference content
- Ⓢ The ability to email links to content or share via social sites
- Ⓢ Embed codes for video content
- Ⓢ DRM-light, downloadable chapters and reference entries in PDF format
- Ⓢ Font size customization for eBook and eReference content
- Ⓢ Citation export options (APA, Chicago, Harvard, and MLA)

Let's take a look at the different sections of the platform!

PROFILE

Creating a profile in SAGE Knowledge allows users to save content and searches. To be able to use Profiles, users will need to sign up as a member of SAGE Knowledge by clicking the "Profile" link towards the top right of every page and selecting "Become a Member."

Once a user creates a profile, he or she can save content in several different ways.

- Ⓢ **My Lists** provide a way for you to gather content on a specific topic or for a particular purpose and group your favorites into collections. Lists can be shared with other users via email.
- Ⓢ **My Searches** allow you to save your common or favorite searches for easy access in the future.
- Ⓢ **My Account** is the area that allows you to modify your registration details: email address, name, and password. It is also the area where you can change your alert settings to manage the information that SAGE sends you about *SAGE Knowledge* and other SAGE products.

00:15 IAN DURY: Here we're developing a Heritage Center, where we want to tell and demonstrate the production of glassware. [Ian Dury Heritage Officer, Ruskin Glass Centre] Recently, we've done an archaeological dig, which has give us a new dimension to the Center and we're able to tell of all different aspects of glass making in Stourbridge for the last 300 years.

00:38 IAN DURY [continued]: We are trying to develop a program that will span across all age groups, coming up with innovative ways in which we get the message about glass making was made. We've just found out that the curriculum has changed this year to include rocks and INAUDIBLE!. And that's perfect.

SAGE RECOMMENDS

SAGE Recommends 

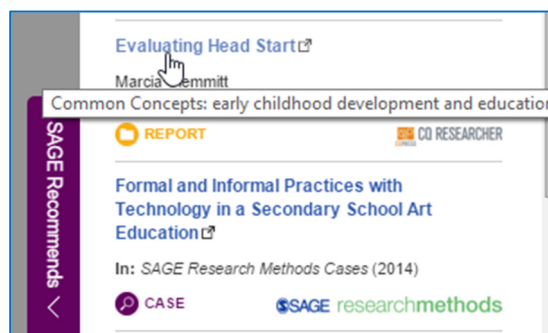

SAGE Recommends is a cross-platform recommendation widget that shows users similar content from other SAGE resources, including SAGE Journals, SAGE Research Methods, CQ Researcher, Business, Researcher, SAGE Stats, and US Political Stats. This new feature discovers relevant content from other SAGE sites, based on what a user is currently reading. It is a great way to discover relevant or interesting material that users might otherwise have missed, including journal articles, case studies, reports, podcasts, and even numerical data.

The tab appears on all book chapter, reference entry, debate, and video pages. The tab does not appear on book landing pages, but users can find content that is relevant to a book by navigating to the introductory chapter and proceeding from there.

By default the recommendations are sorted by relevance, but the drop-down filter allows users to display the most recent content first. Clicking on a link will load the content in a new tab.

A user can often see a tool-tip that tells them what concepts a link has in common with the material they are currently reading by hovering their mouse over the link.

Key Readings: A chronology gives the user the opportunity to visualize development of research within a topic. It shows the categories that the editor defined as most important, plotted on a timeline. Colored dots, each of which represents a key reading, are designed to help researchers recognize patterns within the topic. Links to key readings can also be found beneath the chronology tool.

Users can then select the readings listed to review an abstract of the journal article. They will be able to read the full article if their institution has a subscription

SAGE Knowledge provides books and reference content across the social science curriculum, which can be utilized by students discovering these topics on their own, or by faculty recommending supplementary texts for use.
